

Jonas Hansen

Software developer

Slagelse, 4200 · +45 50106917 · jonas.kerwin.hansen@gmail.com · [GitHub](#) · [LinkedIn](#)

I have been working with PHP and Laravel since 2015 and since then I have helped develop a ticketing agency, a video streaming platform and a recruitment platform.

I enjoy designing and delivering customized and solid solutions, but also enjoy support and listening to user requests and issues with a smile.

Experience

Web developer · JUICE ApS

September 2024 – February 2026 — Copenhagen

Job & candidate matchmaking platform

- Upgraded Symfony 6 to 7
- Built a comprehensive ranking and sorting engine, delivering a quick and efficient method of finding candidates and sorting by relevancy
- AI integration, making it a breeze to upload a job ad and receiving a SmartMatch job post

Web developer · Supeo

September 2023 – September 2024 — Næstved

Web development agency

- Delivered multiple features on Supeo Flex, in React, Express.js & GraphQL
- Gained sole responsibility of customer interactions and development of SamFocus in Laravel 9

Web developer · JUICE ApS

January 2023 – August 2023 — Copenhagen

Job & candidate matchmaking platform

- Introduced CI/CD enabling efficient and fast delivery of Symfony 6
- Contributed to multiple features in Symfony & Twig + Stimulus.js

Software developer · Synchronet

April 2020 – January 2023 — Slagelse

Live streaming social media platform

- Led migration from an expensive setup on Azure using media services to Linode with mux.com for video delivery
- Architected a Kubernetes cluster with Go services and Nginx endpoints wrapping FFmpeg for internal video processing and delivery
- Led frontend development in Nuxt 3 and mobile development in React Native while maintaining Laravel backend

IT & developer · GHC Travel / Iraqi Airways

January 2017 – February 2020 — Copenhagen

Airline booking platform

- Maintained and developed a basic PHP platform
- Migrated from traditional PHP web host to VPS servers I setup, managed and monitored
- Successfully migrated to Laravel 6 and maintained up version 8, including comprehensive PHPUnit test suite ensuring fast feedback loops on changes
- Built 3 distinct frontends in Nuxt 2 consuming API hosted on Laravel backend, ensuring better scalability, user experience and content delivery via CDN
- Greatly improved ticketing workflows by automating airport terminal interactions using UiPath RPA, improving ticket sales and customer satisfaction

Skills

- Linux server management and maintenance
- Web & App development
- Database administration

Education

Two short-cycle higher educations.

Web integrator · Roskilde Teknisk Skole

February 2014 - August 2015 — Høng

Strøm, styring & IT · Selandia CEU

January 2012 - August 2013 — Slagelse

Including Cisco CCNA and IP based network management.
